Call Record Analysis

Data Set Description:

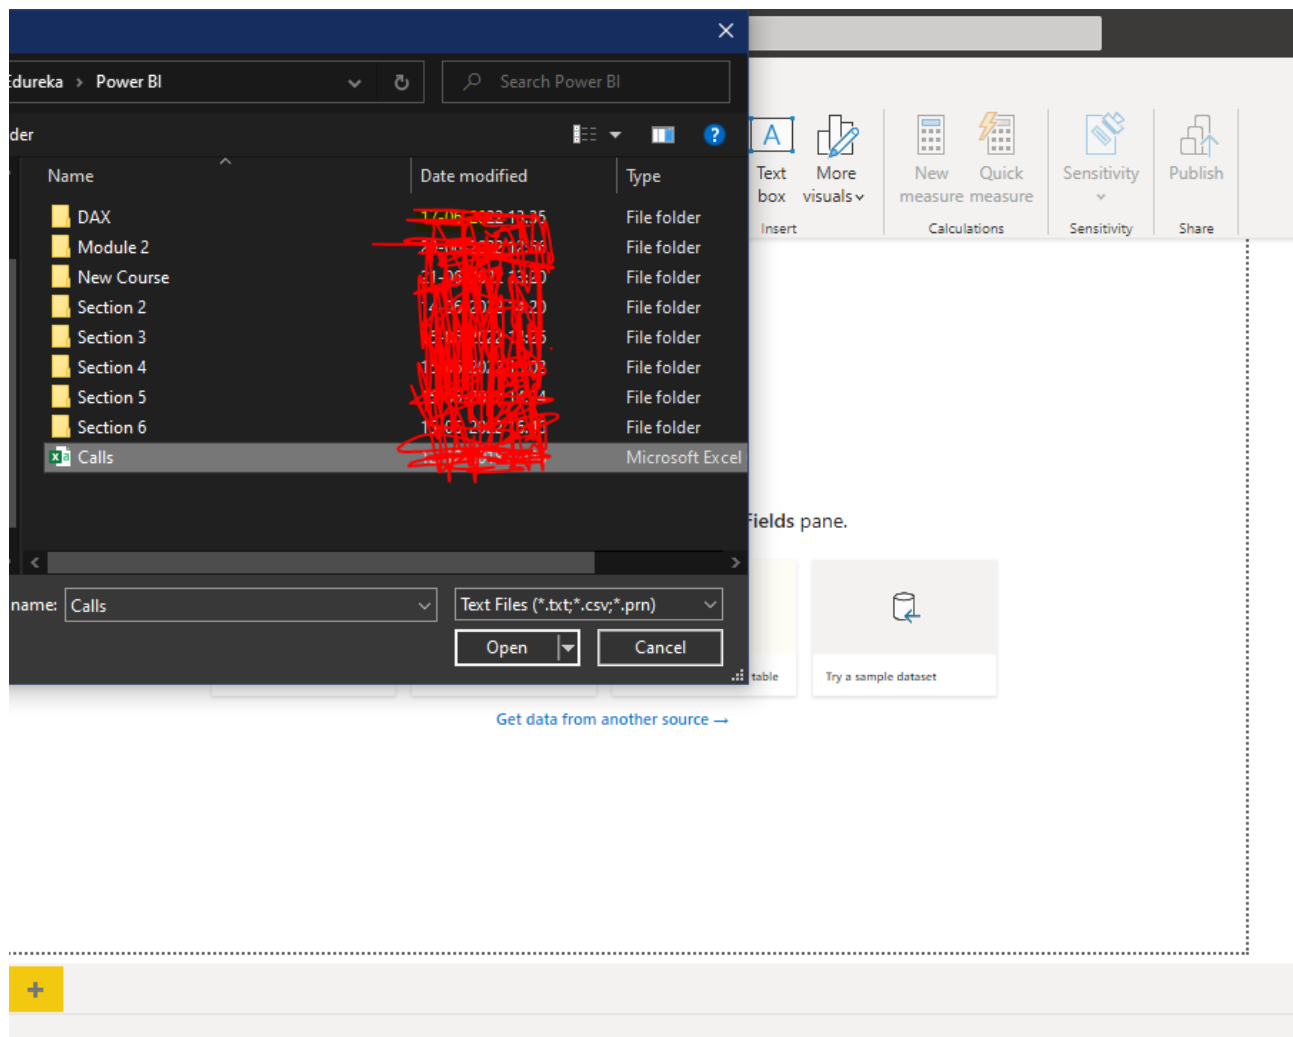

- **Opened:** The call was received at this time by the operator.
- **Closed:** The call when it was closed.
- **Updated:** The call's query was updated since the first call was not resolved.
- **Status:** States if the call's requirement is closed or open.
- **Responsible Agency:** States which company ordered which query/requests.
- **Category:** States which request the category falls into.
- **Neighborhood:** States which neighborhood from San Francisco was the call made.
- **Source:** Call's source.

Working on the Demo

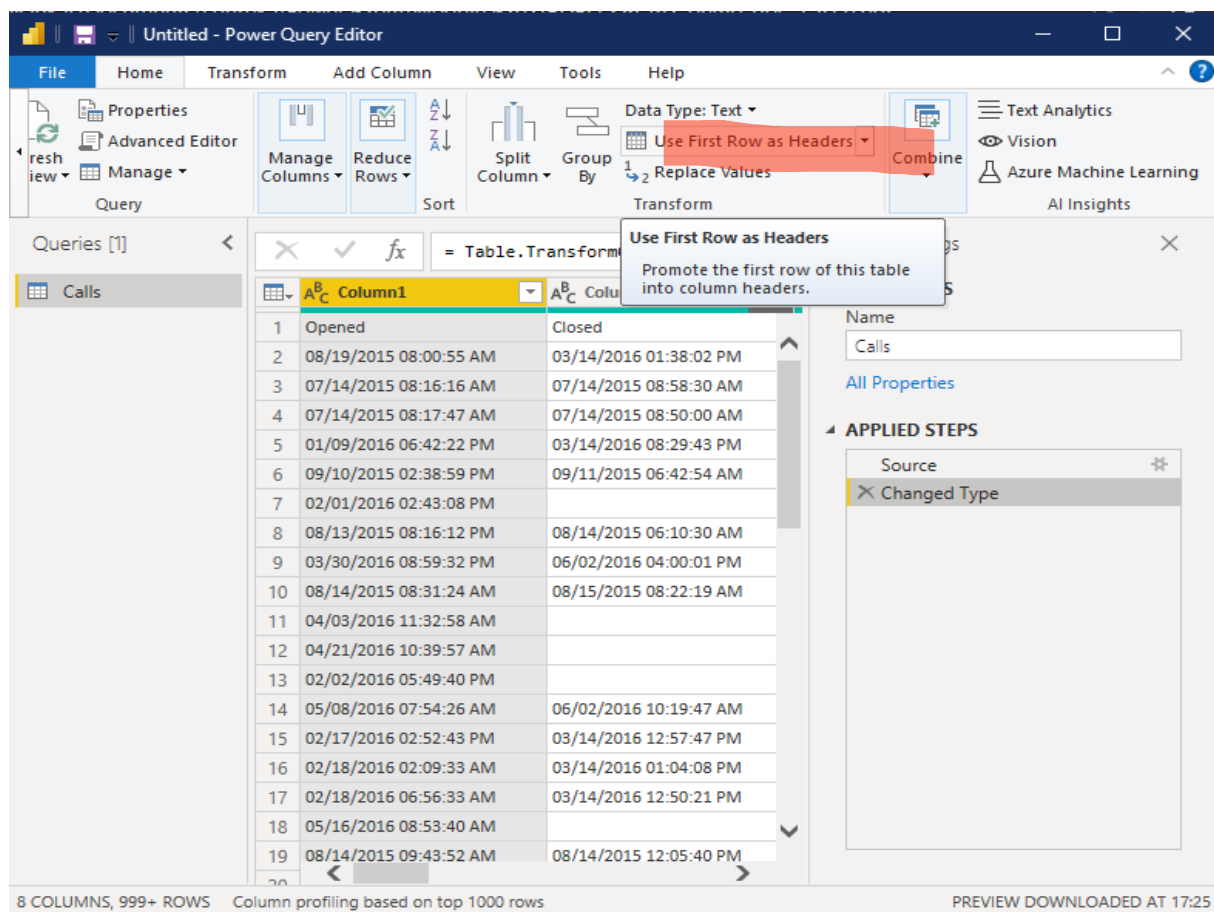

Step 1: Open the Dataset named **Calls.csv**.

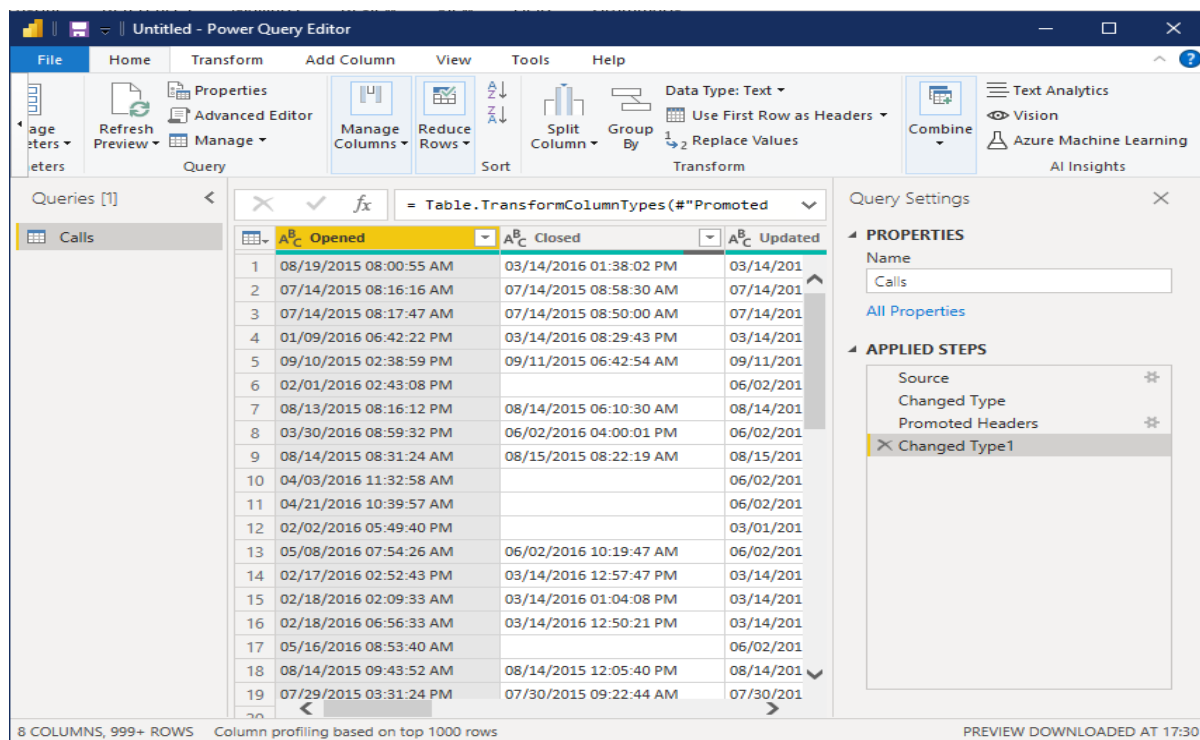

Step 2: Browse and select the **Calls.csv** file from your local system.

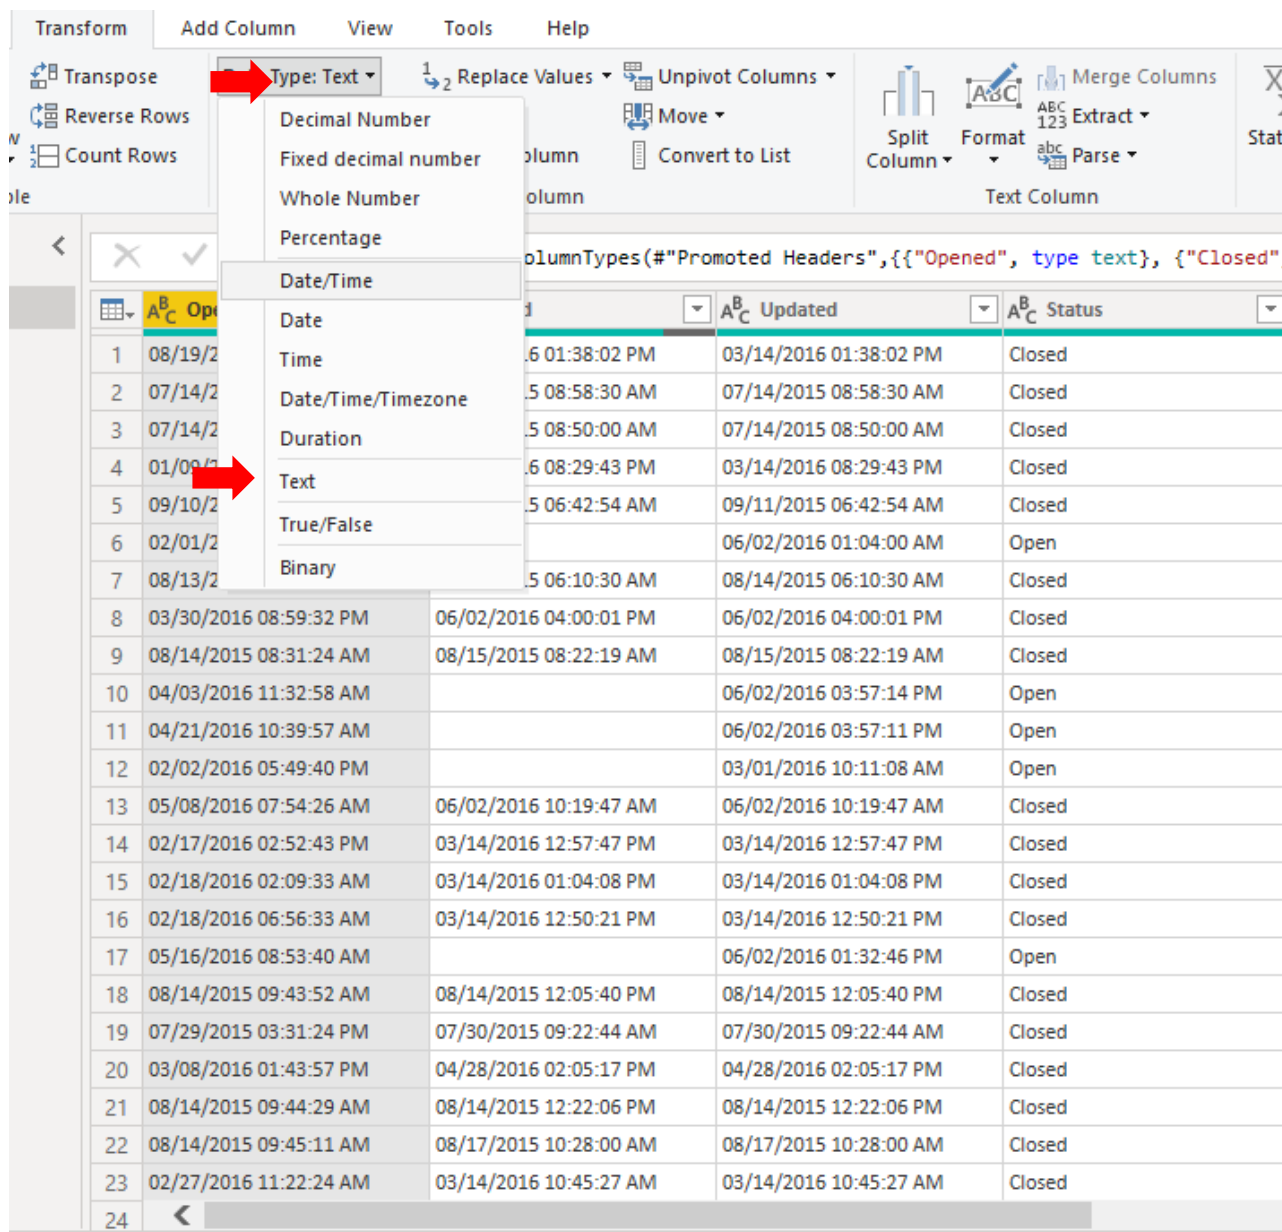

Step 3: Click on **Transform Data** to open the Data set in Power Query Editor. Use the first row as a header if it is not automatically loaded.

Click **Column1** and see the 1st row; sometimes, the **Changed Type1** step happens automatically.

Step 4: Check the types of each column to see whether the Query Editor updated the **Opened**, **Closed**, and **Updated** columns to a Text data type.

The screenshot shows the Power BI Query Editor interface. The 'Transform' tab is active. The 'Type' dropdown menu is open for the 'Opened' column, showing various data types. The 'Text' option is highlighted with a red arrow. The background shows a table with columns 'Opened', 'Updated', and 'Status'.

Step 6: Select the **Opened** column and filter the rows so that opened is after 12/31/2014.

edureka!

The screenshot shows the Power BI Desktop interface with the 'Transform' ribbon active. The 'Calls' table is selected, and a context menu is open over the 'Opened' column. The menu options include 'Sort Ascending', 'Sort Descending', 'Clear Sort', 'Clear Filter', 'Remove Empty', 'Text Filters', and a search bar. The 'Text Filters' section is expanded, showing a list of dates with checkboxes. The 'Begins With...' option is highlighted, and a red arrow points to it. The table data is as follows:

Step 15: Click the New Table button to create a date table on the Modeling table button. In the formula bar, enter the following code:

```
Date = CALENDAR(Date(2015,01,01),Date(2016,09,31))
```

Step 16: In the **Data** view, select the **Date** table. Change the **Date** column's data type to Date and format it to show dd-mm-yyyy.

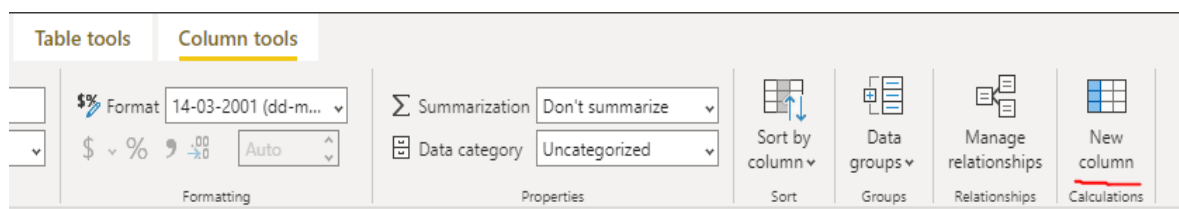

1. Select the **Data view** icon to enter the Data view.
2. **Data Grid:** This area shows the selected table and all columns and rows. Columns hidden from the **Report** view are greyed out. You can right-click on a column for options.

3. **Formula bar:** Enter data analysis expression (DAX) formulas for Measures and calculated columns.
4. **Search:** Search for a table or column in your model.
5. **Fields list:** Select a table or column to view in the data grid.

Step 17: Create a calculated column for **Year, Month No, Month, and Day** using the following code:

```
Year = [Date].[Year]
Month No = [Date].[MonthNo]
Month = [Date].[Month]
Day = FORMAT([Date], "ddd")
```

CALENDAR(Date(2015,01,01),Date(2016,09,31))

Date	Year	Month No	Month	Day

Step 18: Sort the **Month** column by the **Month No** column and hide the **Month No** in the **Report** view.

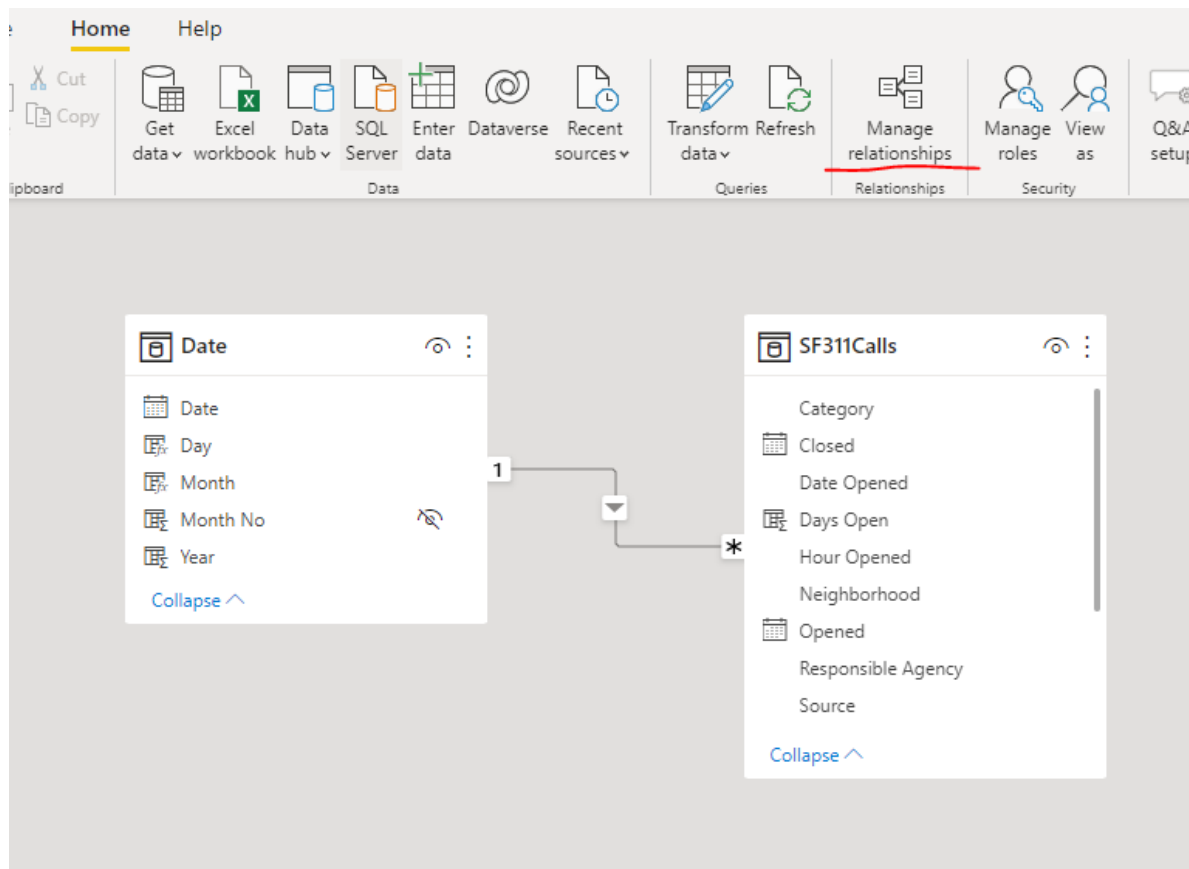

The screenshot shows the 'Column tools' ribbon in Power BI Desktop. The 'Name' field is 'Month' and 'Data type' is 'Text'. A dropdown menu is open for 'Sort by column', showing options: Month, Date, Day, Month No, and Year. A red arrow points to 'Month No'.

The screenshot shows the 'Fields' pane in Power BI Desktop. The 'Date' field is expanded, showing 'Date', 'Day', 'Month', 'Month No', and 'Year'. A tooltip is visible over 'Month No' with the text: 'This field or table is visible in report view. Select to hide it.'

Step 19: Create a New Column by duplicating the first Column **Opened** and Rename it as the Date **Opened**. Also, change its Datatype.

The screenshot shows the 'Column tools' ribbon in Power BI Desktop. The 'Name' field is 'Date Opened' and 'Data type' is 'Date'. The table view shows a new column 'Date Opened' added to the data table.

Step 20: Switch to the Relationship view and create a relationship between the **Calls** table and the **Date** table using the **Date Opened** and **Date** columns.

- Click **Edit** in the new tab.
